Welcome...

... to Seiont Nurseries 2026 Catalogue

At the time of writing this we find ourselves in a busy season with strong demand for our young plants. Forward orders for 2026 already look encouraging. As one of the first UK commercial nurseries to pot Peat Free, we have now made great progress in our propagation in Peat Free and as of January 2024 all propagation has been peat free.

I would like to thank you, our customers, for your support over the past 12 months.

We appreciate your custom and loyalty. It's great to see so many new customers as well!

What's new? We have been working hard with our Breeder Agents to bring some fantastic additions to next year's range. Highlights include:

- Our front cover superstar, Colquhounia Nepalese Flame, Tricyrtis Akachan Daisy, Euphorbia Fromefield Gold, Clematis Red Velvet Truffle and Double Raspberry Truffle, Hydrangea Summer Glow Just to name a few!

We work with many other great breeders and agents from across the globe, including Plantipp, Terra Nova, Planthaven, Kiwiflora, Kolster, Florali, Genesis Plant Marketing, Van Vliet New Plants and Breederplants, keeping us at the forefront of new variety development.

We continue to increase our production of plugs as an option from the traditional P9. A full sales list is available and features a big proportion of our catalogued varieties. This range is dominated by Heuchera and other fast finish perennials but for 2025 we will be offering many more shrubs and hardy Ferns. Tray formats are 104 and 84 depending on variety.

Our goal remains to offer the highest quality product and service and we happily supply to customers of all types and sizes. We sell in trays of 20 and pack 28 trays per Danish trolley. A full trolley qualifies for free delivery, making it easier for customers with smaller requirements to receive regular free deliveries. Unfortunately we can no longer offer deliveries in boxes by courier.

A new box stack Pallet system means we can now arrange delivery direct to sites including central London. This system is also suitable for customers who do not have access for articulated trucks.

Please note there is a small surcharge for this service.

Should you require any further information on ordering or delivery, please contact Julie Owen or myself in our sales office.

I would like, as always to encourage you to visit our site here in beautiful Caernarfon, North Wales. There are several good hotels in the area, which we can book on your behalf. Please do phone 48 hours in advance to ensure there is someone available to meet you on site.

Neil Alcock

July 2025

At Seiont Nurseries, we constantly strive for improved quality of product and service whenever possible. As always, there is a tendency for most of our customers to forward order their liners which we encourage, especially if you require a wide range of plants.

We also e-mail out a regular availability list. Please ask if you want to be added to our mailing list. All varieties which have a PVR No. are produced under licence and it is illegal to propagate the plants without licence.

In accordance with UK Plant Health Regulations, all plants are despatched with passports on the delivery note. This delivery note must be kept in your records for 12 months and produced for the DEFRA Inspector if requested.

BUFFER ZONE STATUS has been granted.

We grow in Bulrush Peat Free growing media across our range except for *Crinodendron* which have 40% peat.

Vine Weevil control is now achieved by 2 applications of Pitcher in June & July and 3-4 applications of Nematodes from August to October. **Please note that ongoing control measures are required when plants are growing on your nursery.** There is no longer a persistent, long term control for Vine Weevil.

Colour labels are available on most of our range.

Size: 05-08cm | **Spec:** M | **Pot:** P9
Shoots: A | **Plug:** 3.5cm

2. Athyrium

minimum PVR

Lots of burgundy wine colouring in its stalk and frond ribs. Otherwise its fronds have an overall dark-green, slightly shiny look. It does not produce a great number of fronds, but those it has arch delicately out from a short erect 'trunk'. It is deciduous outdoors in our Winters.

Size: 05-08cm | **Spec:** M | **Pot:** P9
Shoots: A | **Plug:** 3.5cm

3. Cyrtomium

devevixcapulae PVR

Fertile fronds have pronounced sickle-shaped (backward sweeping) leaflets. Its high gloss texture resembles the Japanese Holly Fern but in overall shape is more like the very common Fortune's Holly Fern; but it grows a good deal larger than either of these and is certainly proving hardier than the Japanese Holly Fern.

Size: 05-08cm | **Spec:** M | **Pot:** P9
Shoots: A | **Plug:** 3.5cm

4. Dryopteris

kuratae PVR

This is a hardy evergreen fern that originates from Eastern Asia. Named after the famous Japanese botanist Kurata it has green pinnate fronds that are deeply serrated. Has jet-black scales upon the unrolling croziers of the fern.

Size: 05-08cm | **Spec:** C | **Pot:** P9
Shoots: A | **Plug:** 3.5cm

5. Dryopteris

stewartii PVR

A large and handsome fern that thrives even in dark, dry, tree-root ridden conditions. It is deciduous but its broad golden-green fronds emerge earlier in the Spring than most other ferns.

Size: 05-08cm | **Spec:** M | **Pot:** P9
Shoots: A | **Plug:** 3.5cm

1. Doodia
